

Dear Friend,

In a time of a global pandemic, World Hope International continued to partner with those in communities worldwide to promote dignity and build opportunity and hope.

While so much in the world seems to have turned upside-down since March 2020, World Hope International staff have proven to be resilient, innovative, bold, and steadfast in our mission, even during these uncertain times. The opportunities have never been greater: amid the devastating impacts of the pandemic, communities around the world are rallying and ready to build a better future for themselves. We are here to work alongside them.

World Hope International has continued to focus on market-based and community-led clean water and energy, global health, protection, and social venture programs. When the pandemic first broke loose, we pivoted to activate a quick and intentional response to COVID-19 tailored to the specific needs of each community we serve.

The causes of poverty are complex and deeply interconnected, but we partner with local communities to implement the most sustainable and environmentally friendly solutions—initiatives that belong to the communities and are centered on their visions for a better future. And we do it all through strong relationships with faith-based and secular organisations, churches, and governments and individuals who share our compassion—including you. We invite partners like you to join us as, with your support, we come alongside these communities around the world.

As you journey through this report, I hope these highlights and stories of good news will inspire you to learn more about World Hope International and consider new ways to partner with us. We know from decades of experience that the best way to make headway against the seemingly intractable problems of global poverty is what we offer — relationship-based community transformation.

Together, we are promoting dignity and building opportunity and hope. With gratitude.

Ruth Thomas CEO Our mission is to alleviate poverty, suffering and injustice of vulnerable and exploited communities with opportunity, dignity and hope.

3,000 households connected to affordable clean water in Banteay Manchey Province Cambodia

Mushroom farmers have **65%** increase with access to toilets and 33% increase to water in Cambodia since 2017.

Schools &

4 health centres
connected to clean
affordable water

OB hand washing stations

were set up to benefit more than **50,000** people

COVID-19

According to World Health Organization, almost 2 billion people depend on health care facilities that lack basic water services. World Hope International drilled 9 wells at health care facilities in Sierra Leone to provide water to reduce the risk of COVID-19 infection for health care workers and patients.

Frequent handwashing is one of the key steps to prevent the spread of COVID-19. For people who do not have easy access to safe, affordable drinking water, this is no simple task. Thus, WHI rehabilitated wells in Liberia despite the restriction of movement and curfew affecting the timeframe to complete each well.

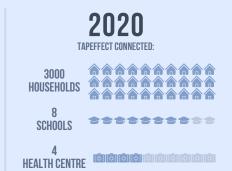

TAPPED WATER AT AFFORDABLE RATES

World Hope International & TapEffect are working together to connect homes, schools, and health care clinics to safe, clean, and affordable water to Cambodians living in under-served rural & semi-rural communities.

Meet Cheath, a high school student who lives in Banteay Meanchey Province in Cambodia. She and her community previously had to use water from a pond - a pond which was contaminated with chemical fertilisers.

This created a lot of problems to the community's health and made Cheath's skin black and rough.

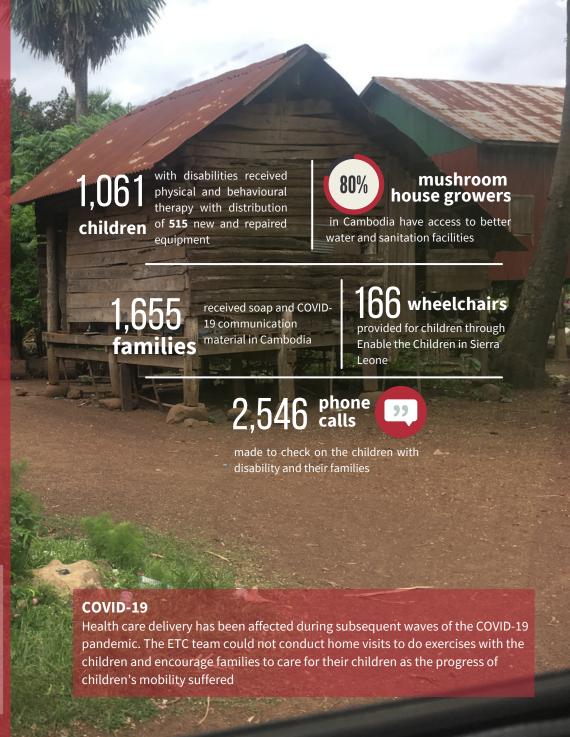

Earlier in 2021 World Hope's social venture TapEffect Cambodia completed their affordable clean piped water to this community. It is now fully operational covering 80 kilometres of piped water across 2 Districts providing 800,000 litres per day.

When asked her thoughts on TapEffect, Cheath said "I am so happy to hear the water pipe system is installed in my village. I hope our people will have reduced sickness, improved health, and increased income!"

The Enable the Children team first met Adamsay in 2015 when she was being used to bring in money for her family through begging. She had TB of the spine which caused her to bend over so that she had to walk with her hands on the floor. At that time, the team referred her for TB education, and she was given exercises and a wheelchair and was sponsored to go to school. At the end of her TB treatment, she was referred to an NGO called Africa Surgery Inc. that helped her to go to Ghana for spinal surgery.

The ETC team did not see her for a long time as she then moved upcountry with her Granny. However, a few months ago she came back to be part of the ETC program again. She started again with her exercises and is sponsored to go to school. Her mother set up a small business with the grant provided by World Hope International to provide for her family. The team is so happy for Adamsay as her life would have been different if she was left begging on the streets.

Johnson was 17 at the time of his rescue. He is the second child in a family with three children. Their father left them and their mother a few years ago and is living with another woman. Johnson enjoyed being a teenager and had an active social life. He played basketball, joined dance competitions, and played video games. While playing video games online, he met Joel, his perpetrator.

Adjusting to the shelter was difficult for Johnson. During the first two weeks, he rarely interacted with the staff. Social workers worked with his former schoolteachers to allow Johnson to continue his studies inside the shelter through a modular course. Soon he began to feel a sense of normalcy again and he was able to engage in therapy.

Relatives of the perpetrator reportedly visited Johnson's community frequently looking for Johnson, making it an unsafe place for him to be. The community social workers worked with local officials to make safety plans to be followed if the relatives of the perpetrator bothered Johnson's family. Meanwhile, the case aunt who lived in a far-off province. Once a risk assessment was completed, reintegration with her was approved.

Today, Johnson is thriving in his new home.

a uniform, received giving them a sense of students belonging at Nomad Mougulu School in PNG

church & community leaders

attended workshops with the focus on Online Safety of Children in the Philippines

COVID-19

According to UNICEF, more than 1 billion children are at risk of falling behind due to school closures aimed at containing the spread of COVID-19. In countries where we work, remote education was not possible as many do not have internet access or personal computers, amplifying the effects of existing learning inequalities. At one of the schools that WHI supports in Cambodia, the enrollment of girls dropped by 6.5% with families pulling the children out of school due to fear.

While lockdowns and stay-at-home orders may be crucial in limiting and preventing the spread of COVID-19, they also have a devastating impact on women and girls living with the risk of gender-based violence (GBV). In the Philippines, WHI is creating awareness and providing care to online sexually exploited children.

The demand for mushrooms decreased as factories and food street vendors closed due to the increased of COVID-19 cases reported in Kampong Cham. Many mushroom producers were affected financially by the loss of jobs of their family members and recent floods affecting their

crops.

33,388 KG mushrooms
