

**Employer:** World Hope International

**Department:** Enable the Children Programme

**Location:** Freetown, Sierra Leone

**Salary:** £26,000 per annum with 1 flight per year with travel to and from Freetown (FNA) airport, visa and residents permit and health insurance

**Position Title:** Physiotherapist - Community Paediatrics Service (40 hours per week)

An exciting and rewarding opportunity to come and work with a dynamic local and expatriate team in Freetown in Sierra Leone, providing Physiotherapy and support services to approximately 800 children with disabilities. In a country of approximately 7 million people, where there are less than ten qualified Physiotherapists, there is a great need for our services and capacity building of those working in rehabilitation. The role will involve assessing and treating children in the two local clinics and in the mountainous Freetown community, and doing on the job and classroom training to the local therapy workers. A new Physiotherapy school has recently opened so there will be opportunities to train the students in Anatomy and other physiotherapy skills as required.

We are looking for an energetic, engaging, and flexible team player who has over two years working experience with evidence of paediatrics and teaching experience. Any experience of working in different cultural settings should also be highlighted. It is necessary to also highlight that World Hope International are a Christian organisation and therefore, the post holder will need to be comfortable in working in this type of environment.

This is a great opportunity to broaden your Physiotherapy experiences and cultural understanding, which can enhance clinical reasoning and patient care.

Sierra Leone is currently rated as a low-risk country in the Covid-19 outbreak. You will be well supported in your role by Anna Vines who has worked in Sierra Leone as a Physiotherapist for 10 years.
